EXECUTIVE OVERVIEW

This page gives an overview of PHC performance across states, showing facility functionality, common diseases, underserved areas, and patient distribution.

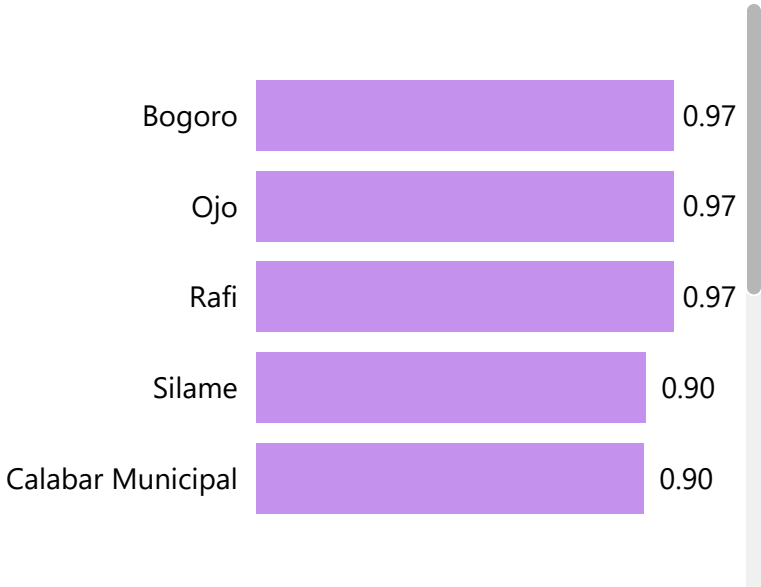

A health system based on Primary Health Care orients its structures and functions toward the values of equity and social solidarity and the right of every human being to enjoy the highest attainable standard of health. [\(PAHO/WHO\)](#).

No of PHC	No of Health Workers	Total Patients	Service Equity Index	Facility Utilization Index
32,000	121,456	3,001,604	58.25%	6.43
